Send letters to health care workers or first responders!

As we already have reached the one year anniversary of the COVID-19 pandemic, we still see too many patients infected with the virus in hospitals and not enough health care workers. We know that they have been overwhelmed throughout this very difficult time. Although we may not be directly affected by COVID-19 itself, it would be a very good idea to express our appreciation to health care workers as they play a huge role in decreasing the number of cases and minimizing casualties. So either write online or on paper to health care workers and first responders.
